

Job Description – Associate Software Engineer

Job Overview:

As an Associate Software Engineer, you'll contribute to the development and maintenance of software applications. Collaborate with cross-functional teams, write clean and efficient code, troubleshoot technical issues, and support the delivery of high-quality solutions. If you're passionate about technology and eager to grow your software engineering skills, we encourage you to join our team.

Job Responsibilities:

- Develop, maintain, and enhance software modules and product features under the guidance of senior engineers while following established design and development practices.
- Write clean, readable, maintainable, and high-quality code that adheres to engineering standards and coding guidelines.
- Participate in software design, code reviews, technical discussions, and implementation activities to deliver robust software solutions.
- Analyze, debug, troubleshoot, and resolve software defects while supporting ongoing application maintenance and stability.
- Investigate technical issues, understand system behavior, identify root causes, and recommend effective solutions while evaluating technical trade-offs.
- Collaborate with software engineers, QA engineers, business analysts, product teams, and other stakeholders to deliver high-quality software.
- Participate actively in Agile/Scrum ceremonies, communicate progress and challenges effectively, and contribute to team objectives.
- Learn and apply software quality, security, performance, and engineering best practices throughout the software development lifecycle.
- Develop knowledge of healthcare workflows, business processes, and domain-specific requirements to build effective healthcare software solutions.
- Continuously enhance technical, professional, and problem-solving skills while staying current with emerging technologies and industry trends.
- Utilize AI-powered development tools responsibly to improve productivity, learning, and software development efficiency.
- Validate AI-generated code and recommendations through critical analysis and testing while maintaining full engineering accountability for the quality, security, and correctness of delivered software.

Qualifications:

- BS degree in Computer Science or Software Engineering.
- Fresh - 01 years of experience is required.
- Basic understanding of one or more programming languages and software development concepts.
- Familiarity with web development technologies such as HTML, CSS, JavaScript, ASP.NET, SQL, or related technologies will be an advantage.
- Exposure to development tools such as Visual Studio, SQL Server, Git, Team Foundation Server, or similar tools is preferred.
- Understanding of object-oriented programming concepts and database fundamentals.

- Strong analytical, problem-solving, and learning abilities.
- IT healthcare domain knowledge will be preferable.
- O/A Levels background will be preferred.
- Working proficiency and communication skills in verbal and written English.

Compensation and Benefits:

Financial:

- Competitive salary and bi-annual bonus.
- Fast track and uncapped career growth for high performers.
- Company-sponsored vehicle financing (car and bike).
- Interest-free loans.
- Provident Fund: CureMD matches up to 8% of your base salary.

Health and Wellness:

- In-house clinic with a team of certified male and female doctors with 24/7 telemedicine service.
- Hospital treatment monitoring by company doctors.
- Comprehensive health coverage for your immediate family (outpatient, inpatient, maternity and parents' inpatient).
- Exclusive health benefits and discounts at top class clinics and labs.

Supportive Workplace:

- Pick-up and drop-off services for female employees.
- In-house daycare facility.
- In-house gym and recreational area to unwind.

Continued Learning:

- Company-sponsored trainings, workshops, development programs and retreats.
- Paid specialized trainings/certifications.

The Difference You'll Make:

At CureMD, every role, whether senior or junior, plays a pivotal part in transforming healthcare. By joining our innovative team, you'll contribute to groundbreaking technology that directly impacts patient care, enhances healthcare efficiency, and saves lives globally. Your skills and passion will drive meaningful change, helping us deliver solutions that support healthcare professionals in critical, real-time settings. Together, we're not just advancing technology — we're making a tangible difference in people's lives. **Together, let's save lives.**
